My Story

I worked as a **marketer** selling mobile & internet on doors to lifting boxes and tidying up retail stores. I loved **gadgets** and wondered how I can use my **creativity to solve** bigger world problems. With the globe moving towards tech, I felt the need and urgency of **upgrading my skills**. At Enspiral **Dev Academy**, I realised the awesome difference I can make with the knowledge I **gained**.

With **1000 Hours** of **coding** and 50 litres of **coffee** (approx), I moved from creating my first 'Hello World' to building '**food bytes**' a voice recognition webapp that renders recipes on command!

I look forward to build more products with your **awesome team**, not limited to using the **below technologies**.

2008-2010

Masters in Business Studies – **Marketing**

Projects and Learnings

Previous Projects	Ongoing Projects / Learnings	Future Projects/ Learnings
Martin Jetpack: Developed a static landing page for www.martinjetpack.com . Tech Used: HTML , CSS , JS , Bootstrap	<ul style="list-style-type: none"> Developing personalised youtube app using react + redux. Worked on developing web component for image slider with / without polymer 	Work on personal portfolio website. Create web tutorials for absolute beginners on Dev Tools like Terminal, Github, Research Methods along-with best practices.
Food Bytes: Developed an interactive audio cookbook at https://audioeats.herokuapp.com/ Tech Used: React+Redux, Annyang , Postgresql , Bootstrap 3	Food Bytes: Enhancing Styles using Material UI & Web Components Shopping-Cart: Improving styles on my personal shopping cart project. https://raao-shopping-cart.herokuapp.com/	Code-Kata: Deep dive into JS - OOP and better my understanding and usage. Learn basics of Angular , Python , C# & Ruby

The EDA Experience

Enspiral Dev Academy was a unique experience. During these 18 weeks apart from the technical skills listed, we learnt **transferable soft skills**. The following table summarizes them:

	Activities	Skills
Pair Programming	Dived deeper on a concept with a pair and solved TDD exercises together on node module Tape .	Learnt to communicate and work as a team. Learnt to provide actionable, specific and kind feedback
Weekly Group Projects	Worked in groups of more than 2 people to come up with an idea and create an app. Created User stories and wireframes . Employed techniques like check-ins and stand-ups to manage work flow.	Improved: Communication, feedback, job allocation , conflict resolution and efficient use of Github . Learnt agile development techniques and use of tasks managers like Trello Board .
Lightning Talks	Personal Presentations. Presented : ES6 concepts, Coffeescript and Mongo DB	Developed: Presentation skills
Campus Style Lectures	Presented: Bootstrap Framework	Learned in depth workings of bootstrap and improved presentation skills
Personal Project	Worked on building an ECommerce Shopping Cart on Express - Node JS, Handlebars and PassportJS	Learned to dig for information and help on channels like stack overflow . Learnt login and credit card authorisation technologies
Grand Project	Pitched app ideas and voted for one. Worked in team of 5 for Food Bytes an interactive audio cookbook. Planned, created user stories, wire-framed, set timelines, assigned tasks, coded and presented.	Learnt: Working under pressure using agile development, managing team dynamics through effective communication and conflict resolution. Sharpened: Git skills, code tidying and refactoring , presentation skills, database structuring.
Friday Fun	Pulled the sofas, projected an 8 hour fireplace on the wall and chilled out.	Learnings: It's not always about coding!

Work Experience

Junior Web Developer	Driver	Courier Contractor	Sales Merchandiser	Asst. Grocery Manager
				
May 2016 - Sep 2016	October 2015 - Current	June - Dec 2014	April 2013 - May 2104	November 2012 -March 2013

Dec 2014 - March 2015: Worked on a personal project to develop RAAO Leather brands and created slim full grain leather wallet range. Created product designs & website for RAAO leather range at www.raoholdingsltd.com . Visited India and organised manufacturing partner. Tested product samples and approved batch production.

April -August 2015: Served a four month contract as a driver at Gateway Express.

Summary of Experience

“**Uber** driving is probably, one of the most enriching experiences I have had. I got my first front-end project through an uber passenger, learnt about EDA, **networked** with developers and gained employer **insights**. Being on the road helped me know real **people** with awesome ideas that enhanced my **creativity**”.

“The position of Asst. Grocery Manager at **New World** was challenging in terms of tasks achievement as I had to manage a **team** and was responsible for the store in my shift. My face to face communication enhanced, **leadership** qualities and **interpersonal** skills developed.”

“**Goodman Fielder** required work without supervision. As a **Sales Merchandiser** I was responsible for inventory management of individual stock keeping units within stores allocated to me. A lot depended on my efficiency to be **proactive & forward thinking**”

“**Pace Couriers** was an owner driver opportunity which involved daily picks and drops at various locations in Wellington region. **Time management** and **quick thinking** was of essence as jobs raced against time. This opportunity enhanced my **interaction** with various corporate, government departments and florists.
